By the Autio of Histon rath, asone and Moss Side. The soons of the story of Nemeric in Inid in the South. The time, the beginning of the present century. The customs and ev. ats of those days are traced with fidelity and spirit, yet so skillfully interwoven with the parrative, that the reader is not wearied by statistics or dry historical details. The hours of fifty years ago seemed at familiar to him as those he visited but yesterday, and their fumates differ little from the men and women with whom he associates daily. The pictures of humble life are graphic and refreshing. In so other work from the authors pen can there be found of character, more carnestness of thought and vigor of discription, and certainly no other contains a plot so

stelling in conception and so ably managed. The reader cannot but remark how irresistably yet naturally he is borne along by the tide of events. There is no need after be is ence-in the current to explain the ominous tittle that frowns at the top of the page. Before the Nemeric is unvailed the render feels her subtle influence, understanding by intuition that there are hidden springs and secret wires under the feet and in the homes of the unanspecting objects of her vengence and the pertinent motto of the authorers fully proves that retribution though sometimes slow is AWAYS BUTG.

A FAILURE -The recent rather funny at tempt of the Breckinridge faction in this Sinte to bring about a fusion with the Donglas party, do s not seem to have been crowned with that complete success which would in-tily the former in secretly congrainfuling hemselves upon having sold the latter at a figure below prime cost, which was unquestionably int-nded to be the result of the transaction. Upon the whole, the attempt was what would be called by candid men in most communities, a failure. It may be true that there is no such word as fail in the lexi. con of the youth whom the gods reserve for a glorious manhood; but if you will look inthe last edition of the dictionary of the Breckinridge Democracy in Tennessee, you will find that the word occupies about nineen-twentieths of the work. That party are tailing in every thing, but they have failed in nothing more signally than in their beautiful little scheme of fusion. That thing went inder almost before they got it affoat upon the tide of unsuccessful experiment. Even the people who had their eyes fixed most intently upon it, hardly had time to see what it looked like before it was snuffed out. It was worse show for the curious spectator who likes to witness a protracted exhibition, than cock-fight in which one of the two fowls is killed at the first blow. Indeed, after a very careful review of things. embracing a period from our earliest infancy
